

Rifki yuliandra

Informatics Student | AI & Machine Learning Enthusiast

Informatics undergraduate student with a strong interest in Artificial Intelligence, Machine Learning, and Data Science. Experienced in developing data-driven and AI-based projects using Python, including deepfake detection and big data analysis. Passionate about applying machine learning and data technologies to solve real-world problems. Currently seeking internship opportunities to gain industry experience and contribute to technology innovation.

Pendidikan

2023 - Now

Universitas Andalas
Informatics

2020 - 2023

SMA N 1 Talamau
MIPA

Project Experience

Deepfake Detection using Deep

- Developed an AI-based system to detect manipulated facial videos using deep learning techniques
- Performed preprocessing including frame extraction and face detection using computer vision
- Trained a classification model to distinguish between real and manipulated videos

Technologies: Python, OpenCV, Deep Learning

Big Data Analysis Project

https://github.com/Alone1011/ProjectBigData_Kelompok_1

- Conducted big data analysis to process and explore large datasets
- Applied data preprocessing and exploratory data analysis techniques -
- Generated insights to support data-driven decision making

Technologies: Python, Pandas

Organizational Experience

2023 - 2024

Staff of Creative Media and Information Department **BEM KM FTI UNAND**

- create designs that will be published on social media as a promotion in accordance with the job desc.
- Managed the organization's Instagram account and update about the organization's activities.
- take documentation of an event that will be published

2024 - 2025

Staff of Media and Information **TECHNOFEST FTI 2024**

- create designs that will be published on social media as a promotion in accordance with the job desc.
- Managed the organization's Instagram account and update about the organization's activities.
- take documentation of an event that will be published

2024 - 2025

Coordinator of Advocacy and Student Welfare Division (Adkesma)

HMIF UNAND

- Coordinated student welfare initiatives and internal division activities
- Facilitated communication between students and faculty
- Organized programs to support student needs

Skill

- Soft Skill : Analytical Thinking, Problem Solving, Teamwork, Adaptability, Communication
- Hard Skill : Python, SQL, JavaScript (Basic), Artificial Intelligence, Machine Learning, Deep Learning, Data Analysis

Bahasa

- Indonesia - Native
- English - Basic
